

CLEANING AND MAINTENANCE Instructions

Wallgard

October 2015

This homogeneous vinyl wall covering is manufactured with the unique PU-Shield protection. This highly improves the cleanability and therefore offers improved hygienic standards.

Cleaning

Clean the wall with a damp sponge or cloth. Use a neutral detergent.

Wet-rooms may necessitate occasional cleaning with acidic cleaning agents, pH 3 to 5, in order to remove residual lime and soap. Rinse with pure water.

Warning! Always follow dosage instructions carefully!

Machine cleaning.

Steam cleaning is a suitable cleaning method. Ideally, spray the area with a cleaning solution, allow a few minutes for dissolving the dirt, then remove all using the steam cleaning equipment. If necessary, rinse with pure water.

Removing marks

Treat marks immediately. Use white/red nylon pads moistened with methylated spirits, cleaning spirit or neutral detergent.

Rinse with clean water and wipe dry.

Information

If any doubts or clarifications should be needed, please contact your local Tarkett representative for further information.
