- ☑ mop with microfibers.

Materials used:

For wet cleaning:

- ☑ Warm water;
- ☑ Neutral cleaning agent for floor coverings, chapter instructions of the Manufacturer on use;
- ☑ Fabric based on synthetic/natural material, soft, absorbing.

Maintenance during the use

In order to maintain the necessary level of external appearance and extended shelf life of the installed Art Vinyl modular floor coverings, the following are necessary: primary protection, daily cleaning during the entire period of use of Art Vinyl modular PVC floor coverings.

To protect Art Vinyl modular floor coverings from the dust, it is necessary to use:

- ☑ Metal grid in front of the entrance – to clean dirt from the soles of shoes;
- ☑ Thick woven «bristle» doormat in the entrance;
- ☑ Rugged mat that keeps and absorbs the remaining dirt.

Total length of three mats must be at least 7 meters.

For daily cleaning, use the following:

- ☑ Dry cleaning using jogger with microfibers or vacuum cleaner;
- ☑ wet cleaning using damp cloth, microfiber jogger (mop) or floor washing machine with daily cleaning agents, in accordance with the manufacturer's instructions for use.

In order to prevent damage to Art Vinyl modular floor coverings, furniture with thin legs should be placed on wooden, cardboard or felt pads.

In order to avoid deformation when moving heavy objects over Art Vinyl modular floor coverings, use resistant and soft materials as base.

You should immediately remove substances that leave hard removable spots using isopropyl alcohol or its water solution.

CAUTION! Long-term contact with rubber should be avoided because it leaves indelible dark stains on the surface.

Protection during the use
